### Preferred Dental Technologies Inc. Digital Dental Technology Update

Preferred Dental Technologies Inc. (CSE: PDTI, US OTC: PDTTF), continues to accomplish development of its digital dental technologies. The primary digital design features 3D printing solutions as well as accommodating current digital milling technologies. The 3D design also retains all the standard features of the EAS Series of dental abutment components' unique features. This patented design is the only one of its kind and represents PDTI's answer to the future of dental procedures as it provides the dental implant industry with a single system which bridges traditional and digital manufacturing techniques using the same base platform.

Throughout the design process, we have also recognized the need for necessary tracking requirements to ensure quality control and traceability for regulatory purposes. Having identified a gap in tracking processes which are currently available, the challenge was to find a solution that could provide tracking from our factory to end user. This tracking would need to provide data for warranty, recall and identifying counterfeiting of the PDTI patented EAS suite of digital products.

The only technology which provides a scalable solution exists in the adoption of a blockchain based platform. We have been in contact with strategic partners who are developing compatible technologies which we anticipate will allow us to successfully fill this reporting gap. We expect to enter into a letter of intent within the next few days with one such strategic partner to utilize their blockchain based system.

#### About PDTI

Preferred Dental Technologies Inc. (PDTI) has been established to advance development and commercialization of various evolutionary and disruptive technologies in the dental implant industry.

MISSION – INNOVATIVE & PRACTICAL SOLUTIONS FOR THE DENTAL INDUSTRY
